

Aviators jacket

Halti Cumulus

From everyday use to extreme conditions

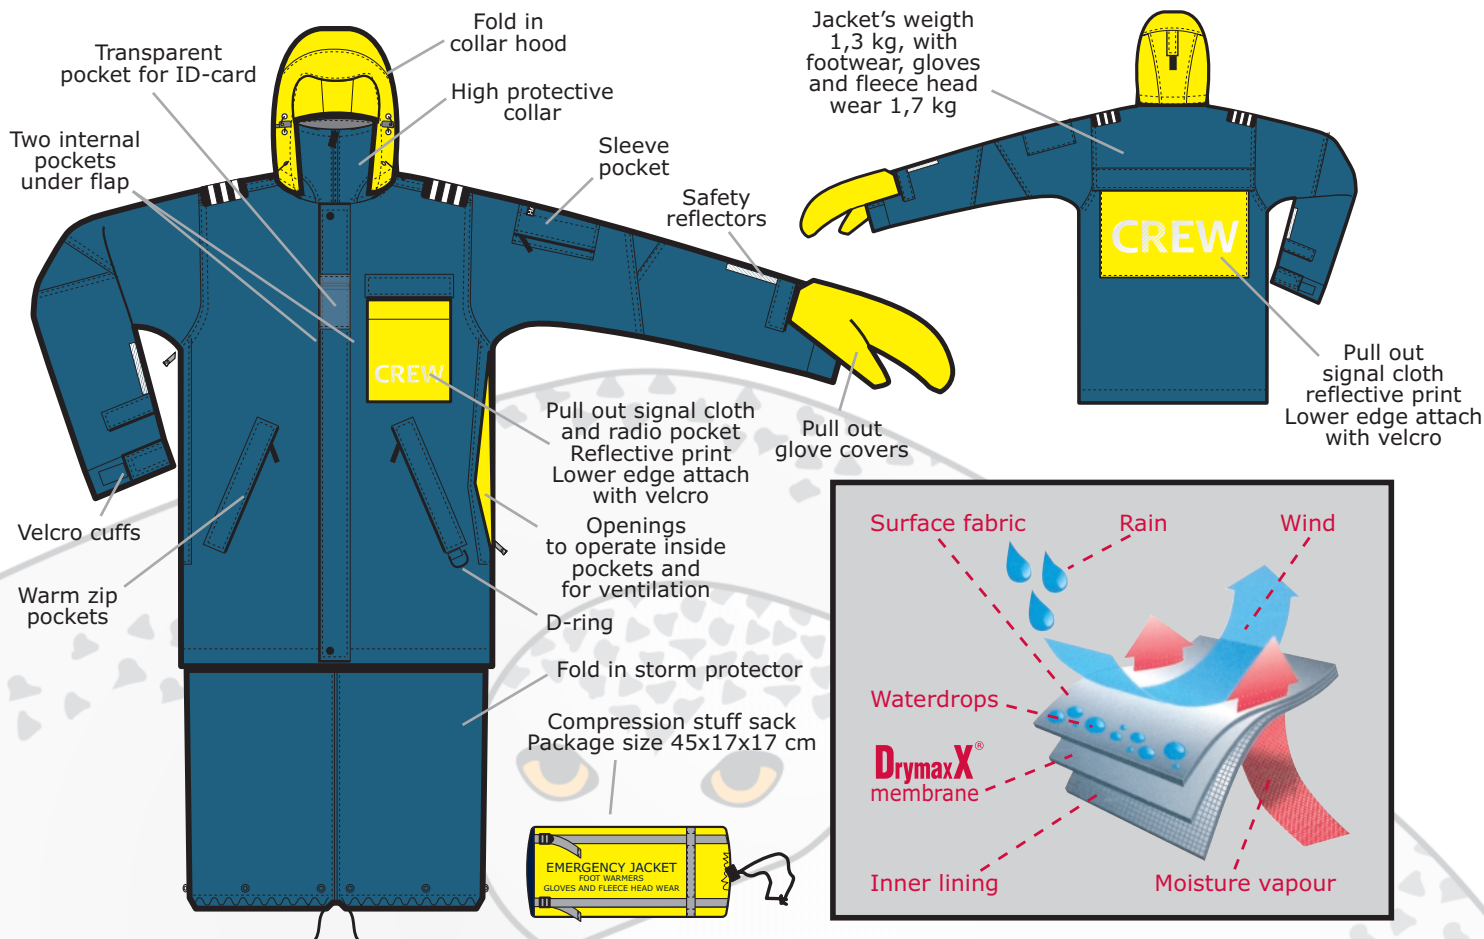

Halti Cumulus is a multi-purpose jacket especially designed for the crew, an outfit that can be used as an everyday uniform. Next to its stylish appearance it is made to protect you from blistering cold, wind and humidity. This is accomplished with jacket's DrymaxX layer. Special features found in jacket are designed to maximize your performance in all conditions. Even the worst ones.

Finnair has launched preliminary project of user experiences.

HALTI

Material

Jacket's DrymaxX membrane has been designed to keep you dry and ready for action even in the most extreme conditions. The microscopic pores of the hi-tech, lightweight DrymaxX fabric are sufficiently small to repel external moisture, but large enough to let moisture vapour escape. Due to the DrymaxX structure, moisture vapour from the body escapes effectively to the outside of the clothing layers, thereby maximizing your performance. Although DrymaxX breathes 100 times better than regular rainwear fabric it still has the water column value up to 10000 mm. Taping in all the seams ensures the waterproof properties. Fabric also protects you against the hardest draughts and the quilted thermal lining keeps you warm even in the harshest weather.

Features

Especially designed for the needs of the crews the jacket has many useful qualities which make your job a little bit easier.

- Plenty of pockets
- Transparent ID-card pocket
- Crew-prints in front and back
- A radio pocket
- Openings for ear plug
- Jacket's own compression stuff sack for smaller plane types
- Safety reflectors considering field action
- Many special features for emergency conditions
- Optional colors according to customers order
- Sizes from s-xxl

Special features

Although made for everyday use, the jacket has a lot of qualities for emergency conditions. An integrated fold in storm protector, wind and waterproof fold in collar and pull out gloveovers to give that needed extra protection against the ultimate conditions. Vacuum packed inside the jacket also comes thermal foot wear, fleece head wear and gloves. An optional survival kit is available for the outfit, including a whistle, waterproof matches, a signal mirror and a ledlight.
